

VERTICAL PROJECTOR MOUNT (VPM SERIES)

VERTICAL IS A SERIES OF UNIVERSAL MOUNTS FOR PROJECTORS. THE MOUNTS ARE EITHER MOUNTED IN THE CEILING OR ON THE WALL DEPENDING ON MODEL. MODERN DESIGN AND SIMPLE MOUNTING MAKES THE MOUNTS A NICE AND AFFORDABLE ALTERNATIVE.

MATERIAL/COLOUR

The metal parts are made of steel and aluminum. The colour is silver, but the short mounts (VPM140) are also available in white or black. The plastic parts are black and made of ABS-plastic.

UNIVERSAL MOUNT

The mounts are universal and fits most of the projectors on the market, except CRT-projectors.

CEILING MOUNTS (VPM140/VPM235)

Fasten to the ceiling with the attached screws. Use the right mounting material depending on the foundation.

WALL MOUNTS (VPM235W)

This mount extends the projector out from the wall. Fasten to the wall with the attached screw. Use the right mounting material depending on the foundation.

LOADING CAPACITY

The mounts are tested for weights up to 15 kg.

SECURITY

The longer mounts (VPM235/VPM235W) are extendable and provided with a security system that prevents the extension arm from being taken apart. This function prevents the projector from falling down and it also causes a delay for the thief.

CABLE MANAGEMENT

On the longer mounts (VPM235/VPM235W) there is an integrated cable management. You can hide your cables to/from the projector in order to have a nice and clean installation.

ATTACHING THE PROJECTOR

The most common screws that are used to attach the projector to the mount are included in the accessories pack (M3, M4, M5 and M6 screws).

SWIVEL ADJUSTMENT

Swivel is the term for how many degrees you can turn the projector around its "own" axle.

HORIZONTAL/VERTICAL TILT

Tilt is the term for how much you can adjust the projector sideways and up/down.

TECHNICAL SPECIFICATION: VERTICAL PROJECTOR MOUNT

Article number	Colour	Length arm (mm)	Extension (mm)	Swivel (deg)	Horizontal Vertical tilt (deg)	Load Capac. (kg)	Net/Gross per unit (kg)	L x W x H per unit (mm)	Net/Gross box (kg)	L x W x H box/10 pcs (mm)
